GLAZED BRICKS.

A transparent glaze on the surface of our buff, pink, or gray bricks, produces beautiful effects and renders the glazed surface impervious to moisture, affording a brick especially desirable from the standpoint of cleanliness and hygiene. Sizes, shapes, and prices, same as enameled bricks.

DEAD FINISH.

Impervious White or Gray Face.

For exterior walls, where it is desirable to avoid the glare of reflected light, and to secure a soft tone of white or gray, these bricks produce handsomer and more pleasing effects than enameled bricks.

The vitrified white or gray face is impervious to water, and the only effect produced upon it by rain is to wash it clean.

We make these bricks in Standard and in Roman sizes.

ARCHES.

When ordering arches, please consult the following pages and give all necessary information as to details; when anything more than a simple semi-circle, segment, flat or Gothic arch is wanted, we should be furnished with full-size detail of half the arch, especially if cut stone or terra cotta is used in connection with the brick work.

Furnish details as far as possible in advance of time the arches will be required. With all necessary bricks in stock, we can usually grind arches within two weeks from receipt of order. If molded shapes are not in stock, and must be made before they are ground for the arches, we should be allowed eight weeks after receipt of the order.

Prices for Arches Containing no Molded Shapes.

	PRICE PER 100 BRICKS.	
	Ground to lay in straight wall.	Ground to lay around segment as in tower or circular bay.
Flat-top arches, red brick	$10 00	$15 00
Flat-top arches, colors other than red	12 00	22 00
Semicircle or segment arches, red brick	5 00	10 00
Semicircle or segment arches, colors other than red	7 50	15 00

For molded shapes ground to arches, add the list price of the shape to above prices for each molded shape required.

Above prices include packing and are f. o. b. our Works.

(*See pages 9 to 14.*)

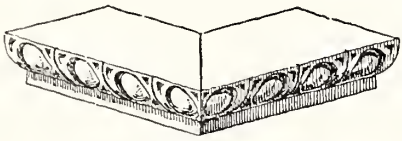
MITRES.

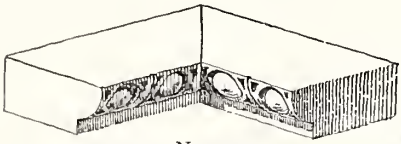
External returns for string-courses, and internal angles for panels, are carried in stock in those shapes most used. When returns or panel mitres of shapes wanted are not in stock we mitre two bricks as shown below.

ALWAYS, WITHOUT FAIL,

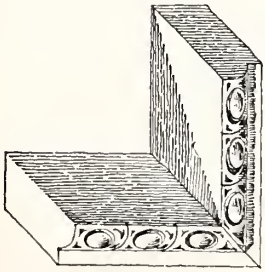
State whether for return in string-course, around pilaster, or for panel mitre. Specify whether *external* or *internal* angle. We show each of above in following cuts. Refer to *number* of cut when ordering.



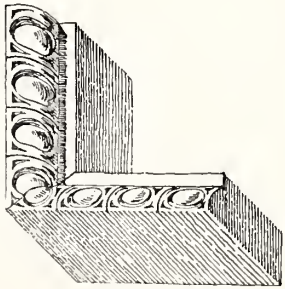
No. 1.
External angle, string-course.



No. 2.
Internal angle, string-course.



No. 3.
External panel mitre.



No. 4.
Internal panel mitre.

MOLDED SHAPES.

Are Standard Sizes Unless Otherwise Specified in Catalog,

and are made to match shade of straight bricks as nearly as possible, but a slight variation in color is often unavoidable.

State exact number required, as we can not estimate quantities from drawings or blue prints.

When ordering, state quantity of each—headers, stretchers, and returns,—and specify what kind of return—whether external or internal angle in string-course, or external or internal panel mitre (*see page 15*).

We have special molds for over three hundred shapes, but do not carry in stock all shapes in all colors. To insure satisfactory delivery in any color, they should be ordered six weeks in advance of requirements.

IMPORTANT.

NOTE.—We make molded shapes to increase the sale of our straight bricks, and are, therefore, compelled to decline to furnish molded shapes except to jobs using our straight bricks.

The following prices are *net*, F. O. B. cars, our works.

For lots requiring packing or drayage an extra charge will be made.

TERMS.—Payment in Kansas City current funds. We make sight draft with bill of lading unless otherwise arranged.

Prices subject to change without notice.

Bricks ordered by mistake or in excess of requirements can not be returned.

STERLING MORTAR COLORS.

We carry a large stock, which enables us to make prompt shipments.

Prices on application.

For lots less than full barrels, an extra charge will be made for packing.

Directions for Mixing Mortar Colors.

First mix the color with the dry sand, then add the cold-slaked lime, and again mix thoroughly. It is very important that the color be uniformly mixed. If it is not added at first, but left until the mortar is made, the labor of mixing is doubled. The more thorough the mixture, the less color is required, and the cheaper it is for the consumer.

Directions for Using Mortar Colors.

Red, Brown and Buff.

For laying 1,000 bricks with spread joints, use about 70 pounds of color to two and one-half bushels of lime and one-half yard of sand. For buttered joints use 65 pounds of color.

Black.

For laying 1,000 brick with spread joints, use 50 pounds of black color to two and one-half bushels of lime and one-half yard of sand. For buttered joints use 40 pounds of color.

For Mottled Work.

Mix each color in a separate portion of the mortar or plaster, then produce the mottled effect by combining the different colored mortars.

ORNAMENTAL TERRA COTTA.—We are agents for the Winkle Terra Cotta Company, of St. Louis, and are prepared to furnish estimates on ornamental terra cotta in any color.

FIRE-BRICK AND CLAY.—We make our fire-brick from a superior grade of fire-clay, in either our Standard- or Roman-press brick size. The smooth, neat surface of this brick permits close joints—an important matter in fire-brick work.

We have the ground fire-clay in 200-lb. sacks.
